## PRE-PROCEDURE FORM

### **Contraindications for ALL Procedures – Please be aware if anything below applies, practitioners will not be able to safely complete your procedure.**

- Are you under the age of 18? House of Beauty does not operate on minors
- Are you currently under a doctor's care for any condition?
- Do you require any pre-medication for any procedures?
- Pregnant or Nursing
- Chemotherapy or Radiation **full treatments:** Prophylactic chemotherapy is generally safe to proceed
- Any active rashes, breakouts, open sores or fever blisters anywhere on your face?
- Active case of rosacea, eczema, psoriasis, shingles or any skin condition.
- Sick with flu/fever.

### **Require Waiting Periods**

- ✓ **Please remember permanent makeup is a process. It takes 6-8 weeks to heal between applications. Be patient while healing.**
- Botox or Disport – 1 Day since you can't lie flat for at least 5 hours
- Fillers (i.e. Juvaderm, Silk, Voluma, Sculptra, etc.) – 1 week
- Accutane full dose – 1 year waiting period (half-dose or prophylactic dose just needs medical clearance)
- Topical Acne Cream – Benzoyl Peroxide, Clindamycin, Pro-Active – 1 week
- Suntanned skin – 3-4 weeks for your face and 2-3 months for scar camouflage
- Peels: Retinols, glycolic acid (A.H.A) and Vitamin C – 2-3 weeks
- Laser resurfacing – 8 weeks
- IPL (Intense Pulsed Light) – 2-weeks post
- Laser used to remove old permanent makeup – 8 weeks

### **Eyeliner Specific:**

- ✓ **Eyelash extensions must be removed 1-2 days prior to eyeliner**
- ✓ **Contact Lenses must be removed prior to an eyeliner procedure (bring your glasses with you)**
- Lasik - Cataract Surgery – 1 month prior and wait **3 months post-op**
- Sty or Chalazion – wait 2 wks. from time of healing
- Latisse or any other eyelash enhancement products (including mascaras) ~ minimum 2 weeks off
  - *(Causes excessive bleeding, sensitivity, bruising and color may not be retained).*
- Eye Diseases (i.e. Glaucoma or Graves' Disease: Hyper Thyroid) – require medical clearance
- Blepharitis: **CONTAGIOUS** – requires medical clearance – chronic inflammation of the eyelid, usually at base of lashes. Symptoms include inflammation, irritation, itchiness.

### **Lip Specific:**

- Fillers (i.e. Juvaderm, Silk, Voluma, Sculptra, etc.) – 1-week minimum waiting period
- Fat transfer in lips – 1-month waiting period for swelling to subside
- Fever blisters on your face or lips. If you have EVER had even 1 in your lifetime, you will require an antiviral (valacyclovir) prescription from your family doctor to start as prescribed. Request enough medication for your touch-up visit to avoid 2-co-pays.

### **These Medical Issues All Require Written Medical Clearance/Possible Pre-Medication for These Procedures**

- Heart valves, all stents, titanium rods, screws, pacemakers, rheumatic fever – medical clearance and pre-medication
- Organ transplants – medical clearance and pre-medication
